# The better combination

## Because it's a hot topic

### OXGEN REGULATOR+

- 30 litre Steel REGULATOR+ Cylinder 300 bar
- Volume 9.25m<sup>3</sup>
- Quick-fit connection
- No need for spanners

#### Benefits

- Over 30% lighter than traditional cylinders
- Easier to manoeuvre
- Need never purchase a regulator again
- Safe – regulator protected in the unlikely event that the cylinder should fall
- Quick-fit connection has built in flash-back arrestor so no need for additional safety equipment
- No need for spanners

### ACETYLENE REGULATOR+

- 30 litre Steel REGULATOR+ Cylinder
- Volume 5.45m<sup>3</sup>
- Quick-fit connection
- No need for spanners

Outlet Flow Gauge  
Pressure Gauge

### Benefits:

- Over 30% lighter than traditional cylinders
- Easier to manoeuvre
- Need never purchase a regulator again
- Safe – regulator protected in the unlikely event that the cylinder should fall
- Quick-fit connection has built in flash-back arrestor
- No need for spanners

## Flash-Back Arrestor There are two of us

### The high lights of this double pack

- Quick connection for safety lock
- Flash-back protection
- Dust filter

### Save time and money

The Quick Connection System locks rapidly and securely onto the cylinder. It's so simple, you don't even need a spanner. This allows you to reduce downtime.

### A secure connection

This is all you need for your order:

#### Acetylene

Code 3001-8666, £22.50

#### Oxygen

Code 3001-8667, £22.50

Oxygen flash-back  
arrestor

Acetylene quick-fit  
flash-back arrestor

It is recommended that flash-back arrestors are tested for leaks and safety at least once per year for CP7 regulations.
